### STEP 3 OF 7

Use a natural shaded lip liner to define lip shape. To play up more fullness, slightly over draw the center sections of both the upper and lower lips. Avoid over drawing in the corners as this looks obvious and messy. Draw by creating short, soft strokes that gradually build into a clean line.

■ Cremestick Liner – 80%

## STEP 4 OF 7

Use lighter shaded lip liner to fill in the center and blend into the deeper edges, depending on lip size and preference.
